

KUUL Vitality: Setting the Standard in Evaporative Cooling Media

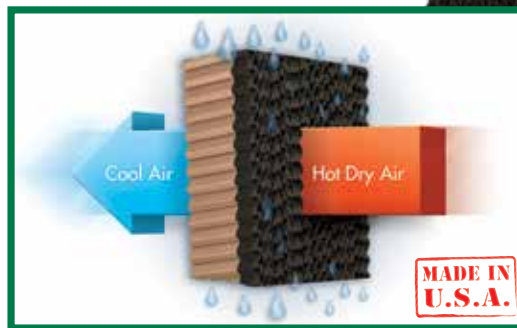

3 options available for each size:

- Standard Kuul pads (no edge coating)
- Kuul pads with 1 edge coating
- Kuul pads with 2 edge coating

Benefits of DuraPro Edge Coating:

- **Increases longevity** - most durable edge coating in the marketplace
- **Weatherproof** - tough and durable for demanding agricultural applications
- **Pad Durability** - Reduces or even eliminates mineral and scale build-up and extends the life of pads
- **Pad Maintenance** - Allows pads to be cleaned more vigorously and, as a result, will further resist mineral and algae build-up and accelerated decay
- **Pad Efficiency** - Does not restrict water or airflow. While increasing rigidity and durability, DuraPro Edge Coating allows for the most efficient and effective cooling

Shipped FOB: Texas

JR's® Evaporative Cooling Water Treatment Products

Cleaner for evaporative coolers and water lines that have salt, calcium, rust or other mineral buildup. JR's will protect the metal surfaces of the cooler to prepare the cooler and pads for better, more efficient performance. It also reduces maintenance and pad replacement, while conserving water.

Use 2x/season
1 quart/25 gallons
of water

For curative use
Up to 32 oz in a
full reservoir

For preventative use
1 oz/gallon of water
every 60 days
